## **THE INTERNATIONAL COMMISSION ON ILLUMINATION**

The International Commission on Illumination (CIE) is an organisation devoted to international co-operation and exchange of information among its member countries on all matters relating to the art and science of lighting. Its membership consists of the National Committees in about 40 countries.

The objectives of the CIE are:

1. To provide an international forum for the discussion of all matters relating to the science, technology and art in the fields of light and lighting and for the interchange of information in these fields between countries.
2. To develop basic standards and procedures of metrology in the fields of light and lighting.
3. To provide guidance in the application of principles and procedures in the development of international and national standards in the fields of light and lighting.
4. To prepare and publish standards, reports and other publications concerned with all matters relating to the science, technology and art in the fields of light and lighting.
5. To maintain liaison and technical interaction with other international organisations concerned with matters related to the science, technology, standardisation and art in the fields of light and lighting.

The work of the CIE is carried on by seven Divisions each with about 20 Technical Committees. This work covers subjects ranging from fundamental matters to all types of lighting applications. The standards and technical reports developed by these international Divisions of the CIE are accepted throughout the world.

A plenary session is held every four years, at which the work of the Divisions and Technical Committees is reviewed, reported and plans are made for the future. The CIE is recognised as the authority on all aspects of light and lighting. As such it occupies an important position among international organisations.

## **LA COMMISSION INTERNATIONALE DE L'ECLAIRAGE**

La Commission Internationale de l'Eclairage (CIE) est une organisation qui se donne pour but la coopération internationale et l'échange d'informations entre les Pays membres sur toutes les questions relatives à l'art et à la science de l'éclairage. Elle est composée de Comités Nationaux représentant environ 40 pays.

Les objectifs de la CIE sont :

1. De constituer un centre d'étude international pour toute matière relevant de la science, de la technologie et de l'art de la lumière et de l'éclairage et pour l'échange entre pays d'informations dans ces domaines.
2. D'élaborer des normes et des méthodes de base pour la métrologie dans les domaines de la lumière et de l'éclairage.
3. De donner des directives pour l'application des principes et des méthodes d'élaboration de normes internationales et nationales dans les domaines de la lumière et de l'éclairage.
4. De préparer et publier des normes, rapports et autres textes, concernant toutes matières relatives à la science, la technologie et l'art dans les domaines de la lumière et de l'éclairage.
5. De maintenir une liaison et une collaboration technique avec les autres organisations internationales concernées par des sujets relatifs à la science, la technologie, la normalisation et l'art dans les domaines de la lumière et de l'éclairage.

Les travaux de la CIE sont effectués par 7 Divisions, ayant chacune environ 20 Comités Techniques. Les sujets d'études s'étendent des questions fondamentales, à tous les types d'applications de l'éclairage. Les normes et les rapports techniques élaborés par ces Divisions Internationales de la CIE sont reconnus dans le monde entier.

Tous les quatre ans, une Session plénière passe en revue le travail des Divisions et des Comités Techniques, en fait rapport et établit les projets de travaux pour l'avenir. La CIE est reconnue comme la plus haute autorité en ce qui concerne tous les aspects de la lumière et de l'éclairage. Elle occupe comme telle une position importante parmi les organisations internationales.

## **DIE INTERNATIONALE BELEUCHTUNGSKOMMISSION**

Die Internationale Beleuchtungskommission (CIE) ist eine Organisation, die sich der internationalen Zusammenarbeit und dem Austausch von Informationen zwischen ihren Mitgliedsländern bezüglich der Kunst und Wissenschaft der Lichttechnik widmet. Die Mitgliedschaft besteht aus den Nationalen Komitees in rund 40 Ländern.

Die Ziele der CIE sind:

1. Ein internationaler Mittelpunkt für Diskussionen aller Fragen auf dem Gebiet der Wissenschaft, Technik und Kunst der Lichttechnik und für den Informationsaustausch auf diesen Gebieten zwischen den einzelnen Ländern zu sein.
2. Grundnormen und Verfahren der Meßtechnik auf dem Gebiet der Lichttechnik zu entwickeln.
3. Richtlinien für die Anwendung von Prinzipien und Vorgängen in der Entwicklung internationaler und nationaler Normen auf dem Gebiet der Lichttechnik zu erstellen.
4. Normen, Berichte und andere Publikationen zu erstellen und zu veröffentlichen, die alle Fragen auf dem Gebiet der Wissenschaft, Technik und Kunst der Lichttechnik betreffen.
5. Liaison und technische Zusammenarbeit mit anderen internationalen Organisationen zu unterhalten, die mit Fragen der Wissenschaft, Technik, Normung und Kunst auf dem Gebiet der Lichttechnik zu tun haben.

Die Arbeit der CIE wird in 7 Divisionen, jede mit etwa 20 Technischen Komitees, geleistet. Diese Arbeit betrifft Gebiete mit grundlegendem Inhalt bis zu allen Arten der Lichtanwendung. Die Normen und Technischen Berichte, die von diesen international zusammengesetzten Divisionen ausgearbeitet werden, sind von der ganzen Welt anerkannt.

Alle vier Jahre findet eine Session statt, in der die Arbeiten der Divisionen überprüft, berichtet und neue Pläne für die Zukunft ausgearbeitet werden. Die CIE wird als höchste Autorität für alle Aspekte des Lichtes und der Beleuchtung angesehen. Auf diese Weise unterhält sie eine bedeutende Stellung unter den internationalen Organisationen.

**International Scientific Committee:**  
(in alphabetical order):

Jean Bastie (DIV2, FR)	PhD, (retired from INM/CNAM as Head of the Optical Radiation Measurement Department)
Peter Blattner (DIV2, CH)	PhD, Head of Optics, Federal Institute of Metrology (METAS), CH, Director CIE Division 2
Cyril Chain (DIV4, FR)	PhD, International Expert in Light and Lighting for the French Government (Ministry of Territory Equality, Transport, Housing METL + Ministry of Ecology, Sustainable Development and Energy MEDDE)
Jean-Michel Deleuil (DIV4, FR)	PhD, Prof. at the Environment and Urban Planning Department, INSA engineer school, FR
Dominique Dumortier (DIV3, FR)	PhD, Vice-Director of LASH laboratory, ENTPE engineering school, FR
Christine Fernandez-Maloigne (DIV8, FR)	PhD, Prof, Director of SIC laboratory, University of Poitiers, FR
Marc Fontoynont (DIV3, FR)	PhD, Prof at Aalborg University in Copenhagen, DK
Ron Gibbons (DIV4, US)	PhD, FIES, Director, Center Infrastructure Based Safety Systems, Virginia Tech Transportation Institute, US, Associate Director CIE Division 4
Teresa Goodman (VPP, GB)	Principal Research Scientist in the Optical Radiation Measurement Group at the National Physical Laboratory (NPL), GB, CIE Vice President Publications
Jacques Lecocq (DIV5, FR)	Application Support Manager, Thorn Lighting, FR
Ronnier Luo (DIV1, GB)	PhD, Professor of Zhejiang University (CN), Leeds University (GB), Colour and Imaging Science, National Taiwan University of Science and Technology (Chair), Director CIE Division 1
Jan Morovic (DIV8, GB)	PhD, Senior Color Scientist, Hewlett-Packard Company, GB, Director CIE Division 8
John O'Hagan (DIV6, GB) Loughborough University, GB, Director CIE	PhD, UK Health Protection Agency; Visiting Fellow, Division 6
Yoshi Ohno (Chair, US)	PhD, NIST Fellow and the Group Leader for Lighting and Color Group at Sensor Science Division, National Institute of Standards and Technology, US, CIE Vice President Technical
Peter Schwarcz (DIV5, HU)	Director CIE Division 5
Jennifer Veitch (DIV3, CA)	PhD, Senior Research Officer in the National Research Council of Canada, Institute for Research in Construction, CA
Françoise Viénot (DIV1, FR)	PhD, Prof. Emeritus at the National Museum of Natural History (MNHN), FR
Peter Zwick (CB)	PhD, Technical Manager CIE Central Bureau

**ADDENDUM 1 (2013-06)**

**PP065:** Piccabolotto, G., Aghemo, C., Pellegrino, A.  
SUBJECTIVE AND OBJECTIVE ASSESSMENT ON LED LIGHTING QUALITY FOR  
MUSEUM SHOWCASES

Paper has been added (pp. 1240 – 1249).

**PP084:** Pellegrino, A., Lo Verso, V.R.M., Cammarano, S., Aghemo C.  
A GRAPHICAL TOOL TO PREDICT THE DAYLIGHT AVAILABILITY WITHIN A ROOM  
AT THE EARLIEST DESIGN STAGES

Paper has been added (pp. 1250 – 1260).

**PP114:** Markey, Y., Deswert, J.-M.  
IN DEPTH INVENTORY FOR A HIGHER QUALITY OF STREET LIGHTING

Paper has been added (pp. 1261 – 1265).
